Roberto,

Please find attached an ir image of the tankers. The dark ones appear to be cold. We count 8 cold tanks. The emissions may be residual from the fire.

Refueling ops have been completed. The crew was able to push a large amount of data up to the server. We are working the data at this time. We are returning to the Arkema site ASAP.

The team is just about to start full resolution processing of the most recent data. I will send out products as soon as possible.
